Examiner: Sagar, Kripa

III Remarks

This supplement to the May 22 Petition is being filed to correct the serial number of an application that was identified in a priority claim in an amendment to the specification in the May 22 Petition.

In the Petition filed May 22, 2003, Applicant amended the specification to claim the benefit of five applications. These applications, by serial number and filing date, are identified in the specification as Serial No. 09/853,250, filed May 16, 2001, Serial No. 09/853,250, filed May 9, 2001, Serial No. 60/202,596 filed May 9, 2000, Serial No. 60/204,473 filed May 16, 2000 and Serial No. 60/257,021 filed December 20, 2000. For the first of these applications, the Serial No. of the application should be 09/858,999 and not 09/853,250. The specification has been amended to identify the correct Serial no. of the application which in fact was filed May 16, 2001 and has the title, "Multi-Level Optical Structure and Method of Manufacture," as set forth in the specification. The above-referenced United States Application Serial No. 09/858,999 had been identified in the Declaration of the inventor by filing date, but not by serial number as that serial number had not been assigned.

The Remarks section of the May 22 Petition indicates that the Petition was filed to claim the benefit of the three Provisional Applications. This statement is correct. The amendment to the specification in the May 22 Petition and in this paper is consistent with this statement.

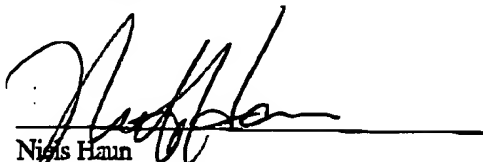

Application No. 09/862,593
